## OMOTO EM Series Boat Motor

SILENT, yet powerful, electric motors are now affordable for every angler, and these Qualie EM/QM electric motors from Omoto have set a new benchmark for trolling motors in terms of performance and value for money.

Omoto claim that the motors offer anglers “power and reliability for fewer dollars.” Stringently tested in extreme tropical conditions, the EM and QM motors feature durable designs that have been constructed from high-quality components.

## WSB Specimen Mono

WITH plans of major expansion into global territories, WSB Tackle is proving its worth with top-quality product ranges such as its Specimen Mono.

This is a premium copolymer nylon line that boasts a greater abrasion resistance than most other monofilaments. Specimen Mono is available in breaking strains from 2.5lb through to 30lb.

Other features include increased sensitivity for better hook setting, superb strength and pliability and aesthetically pleasing packaging.

## FROG HAIR Transition Nymph Leaders

FROG Hair transition nymph leaders are the first tapered nymph leaders to incorporate a hi-viz butt section for quick bite detection.

The leader also includes an ultra-clear tippet in a continuous, knotless construction. Nymph leaders are made using Gamma’s exclusive process to maximise the performance of the leader by offering superior knot strength, incredible toughness and built-in shock resistance.

With more takes, quicker strike detection and greater fish-fighting capability, these leaders offer top performance when nymph or egg fishing.

## VOSELLER Pro-Flyfishing Xpert Clip Tool

CLIP is an innovative tool from the continuously growing Xpert tool series for fly tying.

The construction of the gripping jaws allows material to be processed from either side. By slightly releasing the jaws, the clamped fibres or hair can be bundled simply by pulling them down. Diverse materials can be inserted without difficulty from above into the CLIP to make mixed dubbing threads. There’s no other tool that manages the processing of deer hair for the dubbing loop as quickly and perfectly as this!
